

Ayuob Aghanejad

Ph.D, Nuclear pharmacy

Scopus Author ID: 37063060300

<http://orcid.org/0000-0001-5636-4143>

Radiopharmacist with experience in laboratory procedures, radiopharmaceuticals quality control procedures, radiation safety, drug design, multi-steps synthetic organic chemistry and nano biomedicine. Expertise in tracking and quantifying radiation methods in biological and environmental systems, including coursework in radiochemistry, radiobiology, and radiation dosimetry.

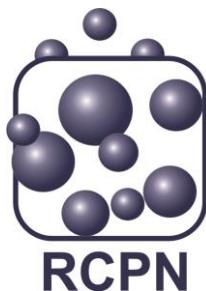

EDUCATION

PhD, Nuclear pharmacy

Tehran University of Medical Sciences, Faculty of Pharmacy

SKILLS

- Synthesis of radiolabelled organic chemicals, purification, filming, electrophoresis and confirming by HPLC, Familiar with scientific search tools, Familiarity with contemporary separation and structure determination techniques transition metal-catalyzed organic reactions and their applications.
- Develop and optimize radiolabeling techniques using various isotopes and various ligands, analytical methods, and formulations for new compounds
- Expert in modern multi-step synthetic organic chemistry, medicinal chemistry and inorganic complexation for radiopharmaceutical applications.

- Expert in pharmaceutical chemistry and drug discovery.
- Background in p positron emission tomography (PET), single-photon emission computed tomography (SPECT), radiation safety and familiarity with cyclotron and reactor processes
- Supervise radiopharmacy operation, dispense & distribute radiopharmaceuticals properly and accurately, quality control tests on prepared products and manually record results
- Actively participate in maintaining a safe work environment by completing required
- Participates and ensures execution of aseptic techniques, including sterility test and pyrogenic testing per company standard operating procedures

Technical Expertise

- Instrumentation of UV-Vis, NMR, FT-IR, Potentiostat Galvanostat, DSC, gamma & beta spectroscopy, thin layer chromatography scanner
- Analysis and purification of organic compounds by HPLC (Analytical & preparative), LC-MS, troubleshooting these machines, planar chromatography (TLC and prep TLC), gas chromatography and affinity chromatography.
- Perform required tests on equipment (e.g. dose calibrator constancy and survey meter checks) and manually record results.
